EXPERIENCE

RECENT PROJECTS

Login / Signup React Form 
June 2025

A clean and responsive login/signup form built with React. It features a modern UI with user, email, and password inputs, along with custom icons. Designed for a smooth user experience and easy integration with authentication backends.

[Check it out](#)

Pokédex App 
June 2025

A web-based Pokédex that uses the PokéAPI to display the original 151 Pokémon. Features real-time search, sorting by name or number, and dynamic navigation to detailed Pokémon info pages. Built with vanilla JavaScript, HTML, and CSS, and fully responsive across different screen sizes and devices.

React Dictionary App 
May 2025

A sleek and interactive dictionary application built with React, featuring live word definitions, phonetics, and audio pronunciation. It integrates two APIs to fetch real-time dictionary data and related content, offering users a fast and intuitive word lookup experience. The app is fully responsive.
